1. Qualitative Information Concerning the Current Quarterly Settlement

(1) Explanation of Business Results

In the consolidated first three-month period under review, the global economy was beset by unabating future uncertainty due to the policy trends of the new US administration and heightened geopolitical risks despite steady recovery in the European and American economies and improved conditions in emerging countries. The Japanese economy also witnessed a modest recovery, but lacked the strength to eradicate the risks of economic downturn as uncertainty abounded on the global stage.

The electronics industry, which is the primary area of business of the Group, saw continued growth in markets relating to advanced vehicle operation support systems, IoT (Internet of Things), M2M (Machine to Machine) and other fields. Meanwhile, in the domestic IT industry, IT investments increased mostly in the cloud, big data and security fields.

Under these circumstances, in an earnest effort to achieve a return on equity (ROE) of 5% and ¥3,000 million in ordinary profit as stated in the V70 Medium-Term Management Plan (closing on March 31, 2021), the Group, in the device business segment, diligently worked to improve existing business profitability by devoting our operations in fields where future market growth is anticipated, while working to revise our business portfolio with an eye on elevating its proportion of high-profit businesses. In addition, we managed foreign exchange and inventory risks, solicited the retirement of employees to optimize our workforce, streamlined operations, and implemented other initiatives to that end. Meanwhile, in the solution business segment, the Group strove to execute contracts for actualized sales negotiations and build a revenue base geared towards mid- to long-term growth through synergies generated between BUs by broadening our lineup of cloud services and sharing customer assets, among other means.

As a result, consolidated operating results for the first three-month period under review revealed \(\frac{\pmathbf{\frac{4}}}{35,192}\) million in net sales (down 9.9% year on year), \(\frac{\pmathbf{\frac{4}}}{97}\) million in operating profit (compared with a \(\frac{\pmathbf{\frac{4}}}{470}\) million operating loss posted for the same period in the previous fiscal year), and \(\frac{\pmathbf{4}}{125}\) million in ordinary profit (compared with \(\frac{\pmathbf{4}}{1}\),494 million in ordinary loss posted year on year). In addition, due to the posting of special retirement benefits stemming from retirement solicitation (\(\frac{\pmathbf{2}}{229}\) million) as extraordinary loss, net loss attributable to shareholders of parent company amounted to \(\frac{\pmathbf{4}}{150}\) million (compared with that of \(\frac{\pmathbf{4}}{1}\),066 million posted for the same period in the previous fiscal year).

The operating results for each business segment are as follows:

Device segment

In the device business segment, our leading products are semiconductors (including system LSIs, microcomputers, LCD driver ICs, memories, etc.) and electronic components (including connectors, capacitors, circuit boards, etc.). These products are sold mainly to electronics manufacturers. We also provide technical support, such as software development and module development.

In the consolidated three-month period under review, social and industrial field sales declined compared with the same period in the previous fiscal year due to low materials sales, with TOY field sales also down as a result of changes in product strategies by major suppliers, leading to net sales of \(\frac{\frac{2}}{32,993}\) million (a 10.7% year-on-year decrease). Please note that, in terms of profit and loss, segment profit amounted to \(\frac{1}{3137}\) million (compared with a \(\frac{1}{31,473}\) million loss recorded for the same period in the previous fiscal year) due to an improved gross profit margin and sharp decreases in foreign exchange losses and loss on inventory valuation incurred in the same period of the previous fiscal year.

Solution segment

In the solution business segment, we are committed to planning and developing infrastructure with operation of information communication networks at the core, mainly for private companies, government offices and local municipalities, as well as to ensuring its operation and maintenance. Especially, as for our core system, we offer services deriving from provision of package software, such as customization according to individual development. Furthermore, we also provide broadcast stations and production companies with editing and transmission of video content, as well as with distribution systems, centered on products from suppliers abroad.

In the consolidated three-month period under review, while embedded systems sales were low, others generally fared well resulting in net sales of \(\frac{\pmathbf{2}}{2}\),199 million (a 4.4% year-on-year hike), with a segment loss of \(\frac{\pmathbf{1}}{12}\) million(compared with a \(\frac{\pmathbf{2}}{2}\)1 million loss recorded for the same period in the previous fiscal year). Please note that, in the solution business segment, due to a planned overemphasis on net sales in Q2 and Q4, the Company anticipates the foregoing segment loss to turn positive from Q2 onward.

(2) Explanation of Financial Position

(Assets)

As of June 30, 2017, assets decreased ¥666 million compared with March 31, 2017, to ¥93,477 million. This was mainly attributable to a ¥5,397 million decrease in notes and accounts receivable-trade, a ¥1,946 million decrease in consumption taxes refund receivable, a ¥4,014 million increase in merchandise inventories, and a ¥2,571 million increase in cash and deposits.

(Liabilities)

As of June 30, 2017, liabilities decreased ¥166 million compared with March 31, 2017, to ¥32,440 million. This was mainly attributable to a ¥272 million decrease in notes and accounts payable-trade, a ¥254 million decrease in allowance for bonuses to employees, a ¥189 million decrease in short-term loans payable, and a ¥541 million increase in other current liabilities.

(Net Assets)

As of June 30, 2017, net assets decreased ¥500 million compared with March 31, 2017, to 61,037 million. This was mainly attributable to a ¥573 million decrease in retained earnings, and a ¥62 million increase in valuation difference on available-for-sale securities.

(3) Explanation of Forecasts for Consolidated Business Performance and Other Future Prospects

The Company has revised its forecast for the consolidated results of the first half year ending September 30, 2017, from the one announced on May 15, 2017, as detailed below. The forecast for the full consolidated fiscal year business performance remains unchanged at this stage, however, any necessary revision will be disclosed immediately based on a thorough investigation of market and customer trends and planned SG&A expenses. Furthermore, the initially projected annual dividend of \(\frac{\pmathbf{x}}{25}\) per share (\(\frac{\pmathbf{x}}{10}\) interim dividend and \(\frac{\pmathbf{x}}{15}\) fiscal yearend dividend) has not changed. For more information, please refer to "Notice Regarding Revision of Business Forecast" released today.

(Prospect for Consolidated Business Results of the First Half Ending Sept. 30, 2017)

Net sales: $\$79,000 \text{ million} \quad (\text{down } 7.4\% \text{ YoY})$
